

Working File Copy Not Approved by EPA. Do not cite.

Notes on Draft of RI Section 5.4

May 24, 2014

Attached you will find the following files for Section 5.4 Surface Water:

- Section 5.4 tables – these include clean versions of the data tables generated from the database for each chemical and the intro tables EPA originally referenced in the matrix file. Of course this file does not include LWG tables (Section 5.3) that are being retained and revised for inclusion.
- Excel file of the database queries/tables (Section 5.4 working tables) we used to write the chemical sections (these have our calculations, etc.) to assist in your review.
- Section 5.4 text:
 - Similar to the other sections, this is submitted in track changes and is difficult to read based on the large number of changes.
 - Viewing in FINAL form might be required/easier to see how it currently looks.
 - A few outstanding data issues are identified with comment bubbles and/or highlighted text; sample counts were difficult to confirm against existing LWG tables, so these should be cross-checked.
